

SMARTRACKS WIRELESS TIMING GATE SYSTEM TAKING ATHLETE PERFORMANCES TO THE NEXT LEVEL

For professional athletes and ambitious runners, keeping a detailed log of your training session and performance is crucial. SmarTracks Wireless Timing Gates is the ideal solution. Humotion Technology has developed a sophisticated solution for documenting and enhancing training performance of athletes.

BENEFITS

- Intuitive design - mobile wireless timing gate system
- Easy to setup
- No limit to the number of athletes who can train at the same time
- Weather—resistant
- Rapid & Explosive Strength measuring
- Adaptable with other sports

SMARTRACKS WIRELESS TIMING GATE SYSTEM

TAKING ATHLETE PERFORMANCES TO THE NEXT LEVEL

SmarTracks Wireless Timing Gate systems provide effortless and precise data logging thanks to their built-in time recording system. The measurement data is recoded automatically by a special sensor or smartphone carried by the athlete. Data such as running time, distance, step frequency and step quantity is documented in a professional training log. Easy to compare and analyse your training performance. SmarTracks Wireless Timing Gate System provides athletes and trainers with the perfect solution for increasing effectiveness and efficiency during training and prevent strain and injury from too much training.

SmarTracks wireless timing gates can also be installed underneath synthetic surfaces. Humotion provide the measuring system and server solutions

PROFESSIONAL TRAINING LOG

- Running and interval times (in real time)
- Distances
- Speed and speed per split
- Step frequency and step frequency per split
- Number of steps and number of steps per split
- Step length and step length per split
- Endurance: Cooper Test
- Jumping power: CMJ, SJ, DJ
- Tapping Tests, includes Tapping Frequency and Number of Taps
- Reaction Time
- Agility Tests

INTELLIGENT TRAINING

- Analysing training level
- Identifying performance reserves
- Improving performance
- Preventing injuries

INNOVATIVE TECHNOLOGY

- Fabric-based measurement sensors
- Rechargeable battery with 10 hours backup
- High-quality magnetic gates
- Easy to use for Indoor and Outdoor
- Provision for increasing the number of gates
- Wireless time measurement system
- Weather resistant
- Inbuilt accelerometers, magnetometers, gyroscope
- Minimum accuracy 1/100th of a Second
